

Charles Hunt

Charles (Chip) Hunt is a hydrologist with the U.S. Geological Survey in Honolulu. He served as Oahu ground-water specialist for the National Water-Quality Assessment (NAWQA) Program, and presently leads the NAWQA Principal Aquifer synthesis team for Western Volcanics (Oahu, Columbia Plateau, and Snake River Plain). He joined the Honolulu office in 1979, having also worked as a USGS field assistant in 1976 on the Snake River Plain and Cassia Mountains of south-central Idaho. His education includes a BS in Geology from Stockton State College and graduate course work in hydrology at the University of Hawaii. He has worked on hydrologic studies of Hawaii, Guam, Kwajalein, and Diego Garcia in the Indian Ocean. Professional interests include volcanic and atoll island hydrogeology, decadal-scale climatic effects on water resources, and statistical and spectral analysis of hydroclimatic and oceanic time series.
