

Gordon Tribble

Gordon Tribble has been the Hawaii and Pacific Islands Director of water programs for the U.S. Geological Survey since Fall 1999. He has authored over 25 scientific papers on subjects such as ground-water contamination, seawater chemistry, underwater volcanism, and coral reef ecology. He received a BS in Biology from the University of California at Santa Barbara in 1979 and a PhD in Marine Geochemistry from the University of Hawaii at Manoa in 1990. In addition to several years as a professional student, he has worked as a hotel desk clerk, fisheries vessel observer, and commercial fisherman. He started working for the USGS in 1988 as a laborer on a drill crew. He has worked on hydrologic studies in Hawaii, the Marshall Islands, Palau, the Mariana Islands, and Diego Garcia in the Indian Ocean.
